Uploading .fig to figma

Add files to Figma

1. Open the page in Figma you want to add the file to. This could be the file browser, or a specific Figma file.
2. Locate and select the file(s) you want to import. These could be on the desktop or in a folder.
3. Drag the file(s) over to Figma. A blue box will appear in Figma to show that your files are ready to import.
4. Release your mouse to start the import process. Depending on the file size, this can take a couple of seconds.
5. Once completed, click Done to return to the file browser

Drag & Drop

You can drag a file from a folder on your computer, or from your Desktop, right into Figma. This is available on both the Figma Desktop app and the Figma web app (browser-based).
You can drag and drop Files into the file browser or the Editor. Figma supports different file formats for each approach.
